

# INSTRUCTIONS

## convection oven

### SETTING UP YOUR CONVECTION OVEN

- Set up your oven on a flat, sturdy surface not bothered by heat. Be sure the oven is at least 4 inches away from any overhead cabinetry and 2 inches away on all sides from any wall
- Plug cord into outlet (The digital display will flash 88:88)
- Set the clock:  
Press **CLOCK** and a beep will sound. Immediately press  $\triangle$  and  $\nabla$  until display shows the correct time. Tapping the pad causes the time to change in minutes. Holding down the pad causes the time to jump in 10-minute segments. Release when clock is set at correct time of day. Press **CLOCK** again to set time. A beep will sound and the word "**SET**" will disappear from the digital display

### USING YOUR CONVECTION OVEN

- Place baking pan(s)/tray(s) on racks, leaving at least  $\frac{1}{2}$  inch of air space around all sides to allow the air to circulate freely.
- Set the temperature control knob to the desired temperature. When following recipes for baking cakes, pies, and cookies, set temperature 75° lower than recipe requires.
- To begin cooking:  
Press **COOK/OFF**. After the beep sounds, immediately press  $\triangle$  until the digital display shows the amount of time you want the oven to be on. When you finish setting the time, a beep will sound and the oven will automatically turn on

**\*\*\*REMINDER: No preheating is necessary\*\*\***

The power-on indicator light will illuminate and remain on until the oven goes off automatically when the cooking time is over. You will hear 3 beeps, 1 second apart, to let you know the food is ready and one beep every 10 seconds until turned off

- To turn off beeper: Press **COOK/OFF**
- To cancel cooking at any time: Press **COOK/OFF** once
