

Double Hooded Propane BBQ Operating Instructions

1. Ensure all burners are in the "OFF" position (clockwise).
2. Open BBQ lids
3. Ensure that the propane tank is properly connected.
4. Turn the propane tank on at the source **SLOWLY** and wait 2 minutes before ignition. Failure to wait may cause the safety device in the cylinder valve to activate, which will reduce the flow of gas from the cylinder
5. Turn the lighter tube (pilot) valve to the "ON" position. (Note: two lighter tubes are provided, one for the left side and one for the right side)
6. Insert a match or barbecue lighter into the holes provided on the ends of the BBQ
7. Visually check to ensure the lighter tube is burning and once the lighter tube has been lit, any other main burners can be lit. (Push in and turn to "HIGH") The unlit burners will then light automatically
8. Visually check to ensure that all burners that are intended to be on are lit
9. Adjust individual burners as desired

To turn OFF the BBQ

1. When finished, turn propane "OFF" at the tank and allow the barbecue flames to extinguish
2. Turn all burner and pilot valve knobs to the OFF position
3. **CAUTION** the top of grill may remain hot up to **ONE HOUR** after extinguishing the BBQ
